

EXPORT READINESS PLAYBOOK

From Ready to Export-Ready

Your step-by-step guide to building a globally competitive, AI-enabled export operation.

6 Weeks

First outcome

4 Stages

Crawl → Fly

Sprint 0

TRA included

INTRODUCTION

About This Playbook

This playbook is your practical guide to transforming your organisation's export operations with structured methodology, AI-enabled tooling, and proven frameworks. Whether you are new to export markets or looking to scale your existing international footprint, the Kinexus Export Readiness framework gives you a clear, measurable path forward.

■ Kinexus Systems is an agentic-workflow and AI-transformation consultancy. We embed next-generation technology into operations — not as bolt-ons, but as core infrastructure — so organisations achieve measurable outcomes in weeks, not quarters.

What You Will Learn

- How to assess your current export readiness across 5 dimensions.
- The Kinexus 4-Stage framework: Crawl → Walk → Run → Fly.
- How to complete Sprint 0 — your Technology Readiness Assessment (TRA).
- A 6-week roadmap to your first measurable export outcome.
- Practical checklists for team, technology, process and compliance.
- How to build a self-optimising export engine with AI agents.

6 Wks First measurable outcome delivered	4 Stages Crawl → Walk → Run → Fly	Sprint 0 Technology Readiness Assessment included
--	---	---

Who This Is For

This playbook is designed for founders, CEOs, export managers, and operations leads of growth-stage businesses that are serious about entering or accelerating in international markets. You do not need a technology background — our team handles the technical architecture while you focus on market strategy and relationships.

FRAMEWORK OVERVIEW

The 5 Dimensions of Export Readiness

Before any technology or process investment, Kinexus assesses your organisation across five core dimensions. Each dimension is scored 1–5 during Sprint 0, giving you a baseline readiness score and a prioritised action plan.

Dimension	What We Measure	Min. Score to Export
1. Market Intelligence	Data sources, buyer insights, pricing models, competitor tracking	3 / 5
2. Operational Capacity	Production scalability, quality systems, lead-time consistency	3 / 5
3. Compliance & Regulation	Export licensing, customs classification, trade agreements	4 / 5
4. Digital Infrastructure	ERP/CRM integration, e-commerce readiness, data pipelines	2 / 5
5. Financial Resilience	FX risk management, payment terms, working-capital buffers	3 / 5

■ Your Readiness Score Drives the Plan

After Sprint 0, you receive a dimension-by-dimension score card. Dimensions scoring below threshold become Sprint 1 priorities. Kinexus co-designs a sprint backlog with your team to close each gap in the fastest, most capital-efficient sequence.

CRAWL → WALK → RUN → FLY

The 4-Stage Framework

Every organisation moves through four stages of export capability maturity. The Kinexus framework is designed so each stage builds directly on the last — reducing risk, compounding value, and delivering observable outcomes at every step.

1

CRAWL — Foundation & Readiness

Establish the baseline. Get compliant. Build the data infrastructure that makes everything else possible.

- ✓ Sprint 0 Technology Readiness Assessment completed
- ✓ Export compliance checklist signed off
- ✓ Core data pipelines connected (ERP, CRM, market feeds)
- ✓ Team trained on export processes and tools

2

WALK — Process Automation & Market Entry

Automate high-friction export workflows. Launch in your priority market. Measure everything.

- ✓ Customs and documentation workflows automated
- ✓ Buyer outreach sequences live with CRM integration
- ✓ First shipment or digital delivery completed
- ✓ Weekly KPI dashboard operational

3

RUN — Scale & Optimisation

Expand market coverage. Use AI agents for pricing, forecasting and relationship management at scale.

- ✓ Multi-market pipeline active (3–5 markets)
- ✓ AI-assisted demand forecasting deployed
- ✓ Dynamic pricing engine live
- ✓ Customer success automation in place

4

FLY — Autonomous Export Engine

Your export operation runs with minimal manual intervention. Kinexus agentic workflows handle monitoring, alerting and optimisation.

- ✓ End-to-end agentic workflow monitoring active
- ✓ Self-healing compliance alerts configured
- ✓ Continuous market intelligence feed operational
- ✓ Monthly board-level export performance report automated

WHERE EVERY ENGAGEMENT STARTS

Sprint 0: Technology Readiness Assessment

Sprint 0 is a structured 2-week diagnostic that gives you a clear, unbiased picture of where your organisation stands today — and exactly what it will take to reach export readiness. It is not a sales exercise; it is a working engagement that delivers a tangible, actionable output.

What Sprint 0 Covers

Week	Activity	Output
1	Stakeholder interviews (ops, finance, tech, sales) Current-state process mapping Technology stack audit	Process maps Stack inventory Gap analysis draft
2	Dimension scoring (1–5 across all 5 areas) Risk register creation Sprint backlog drafting Readiness Score Card presentation	Readiness Score Card Prioritised sprint backlog Implementation roadmap

■ Deliverables You Receive at Sprint 0 Close

1. Export Readiness Score Card (5-dimension radar with benchmark)
2. Risk register with mitigation priorities
3. Prioritised sprint backlog (Weeks 1–6)
4. Recommended technology stack with vendor shortlist
5. Budget and timeline estimate for Stages 1–4

SPRINT DELIVERY PLAN

The 6-Week Roadmap to First Outcome

After Sprint 0, Kinexus runs a focused 6-week delivery sprint. Each week has a defined theme, work packages and acceptance criteria agreed with your team in advance.

Wk	Theme	Key Deliverables	Owner
1	Foundations	Data environment set up Access provisioned Baseline KPIs agreed	Kinexus + Client IT
2	Integration	ERP/CRM connectors live Data quality validated First dashboard draft	Kinexus Tech
3	Automation Build	Workflow 1 automated User acceptance testing Training session 1	Kinexus + Ops Lead
4	Compliance	Documentation templates deployed Compliance checklist signed Regulatory review	Kinexus + Legal
5	Go-Live	First export transaction processed KPIs live on dashboard Issue log reviewed	Joint Team
6	Optimise & Hand-off	Performance review Backlog for Stage 2 agreed Knowledge transfer done	Kinexus PM

All sprints use two-week review cycles with a live Kanban board shared with your team. You always know what is in progress, what is blocked, and what is done. There are no surprise scope changes — any new requirements are triaged into the next sprint backlog with your approval.

SELF-ASSESSMENT TOOL

Export Readiness Checklists

Use the checklists below to assess your current readiness before your Sprint 0 engagement. Items marked as incomplete become priority inputs to your sprint backlog.

Team & Leadership

- Export champion identified at C-suite level
- Dedicated export operations resource assigned
- Cross-functional export team formed (finance, ops, sales)
- Team completed at least one export-compliance training module

Technology & Data

- ERP system operational and data validated
- CRM capturing international lead and customer data
- Business intelligence / reporting tool in place
- Secure cloud file storage for compliance documents

Process & Compliance

- Export Control Classification Number (ECCN) determined
- HS codes mapped for all exportable product lines
- DGFT registration or equivalent authority registration active
- AML / KYC procedure documented for international buyers
- Incoterms policy agreed with finance and logistics

Market & Commercial

- At least 2 target export markets identified with market-sizing data
- Competitive pricing model for priority market completed
- Distributor or agent shortlist for priority market prepared
- FX hedging strategy agreed with CFO / finance lead

WHY KINEXUS IS DIFFERENT

The AI & Agentic Advantage

Traditional export consultancies deliver reports. Kinexus delivers running systems. Our differentiator is agentic AI — autonomous software agents that monitor, act and improve your export operations continuously, 24 hours a day, without adding headcount.

What Agentic Workflows Replace

Manual Process	Kinexus Agentic Alternative	Time Saved
Manually collating weekly export KPI reports	Auto-generated dashboard refreshed daily	4–6 hrs/wk
Manually checking HS code and duty updates	Regulatory monitoring agent with instant alerts	2–3 hrs/wk
Chasing freight forwarders for shipment ETAs	Logistics tracking agent with escalation rules	3–4 hrs/wk
Building buyer outreach email sequences	AI-personalised outreach with CRM logging	5–8 hrs/wk
Producing monthly compliance attestation	Automated audit trail with one-click reporting	6–10 hrs/wk

Our Technology Principles

Your Next Steps

Getting started is simple. Sprint 0 can begin within two weeks of signing. There are no long procurement cycles, no RFP required. We work directly with your leadership team to kick off immediately.

Step 1

Book a 30-minute discovery call

Tell us your export ambition and current situation. We will confirm whether Sprint 0 is the right starting point.

Step 2

Receive Sprint 0 proposal

Within 48 hours of your call, we send a fixed-scope, fixed-price Sprint 0 proposal. No ambiguity, no hidden fees.

Step 3

Sprint 0 kicks off

Your Kinexus lead consultant and technical architect are assigned. Stakeholder interviews scheduled in week one.

Step 4

Readiness Score Card delivered

Two weeks later, you have a complete picture of your export readiness and a fully costed implementation roadmap.
